

**FOR IMMEDIATE RELEASE**

## Improved Access to Lyophilization Resources

---

**Lyophilization Technology, Inc. provides improved access to lyophilization resources through their new website launch.**

**Philadelphia, PA January 31, 2018** - Lyophilization Technology, Inc. (LTI) officially announces the launch of a new website which coincides with an expanding role as a global leader in lyophilization solutions through scientific and technical services for the healthcare industry! The new site is accessible through <https://www.lyotechnology.com>.

This new website provides visitors a straightforward way to learn about LTI's services, technology, and solutions. It gives a clear message of identity, philosophy and principles, and expertise for developing and delivering solutions to meet client's needs. The website also embraces a clean design and intuitive and consistent site-wide navigation system with improved menu functionality to readily access information in three main areas:

[Development Sciences](#); [Clinical Manufacturing](#); and [Technical Services](#).

Additional enhancements include a Resources tab which provides visitors with quick access to research posters, presentations, and publications. Authored by LTI staff and presented to the industry to enhance the greater knowledge and promote technological developments.

Also, current and future clients can meet the Project Director, a member of our scientific staff responsible for client projects from start to finish, or one can quickly begin a new project with the "[Let's Get Started](#)" page.

The website will be consistently updated the content with new articles, newsletters, and announcements throughout the year.

This new website, provides easy access to desired information. Emails with questions, suggestions, or comments can be sent directly to [inquiry@lyo-t.com](mailto:inquiry@lyo-t.com).

### **About Lyophilization Technology, Inc.**

---

LTI is a Contract Development & Manufacturing Organization (CDMO) focused on all aspects of lyophilization for preparation of healthcare products.
